IMAGE PROCESSING & COMMUNICATIONS

An International Journal

Aims and Scope

IMAGE PROCESSING and COMMUNICATIONS publishes original research articles and serves as a forum for stimulating innovative research ideas, state - of - the art methods and tools in all aspects of image processing and communications. Theoretical, experimental and survey articles are all appropriate to the journal.

Specific areas of interest include:

- ♦ Image processing : Coding, Analysis and Recognition
- ♦ Image manipulation
- ♦ Communication of visual data
- ♦ Network architecture for real-time video transport
- ♦ Video coding algorithms and technologies for ATM/packet network
- ♦ Protocols for packet video
- ♦ New visual services over ATM/packet network.

Papers are solicited in these topic areas.

Copyright

It is the condition of publication that manuscript submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitted of manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproduction or any other reproductions of similar nature and translations.

No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form a by any means, electronic, photocopying or other wise, without permission in writing from the copying holder.

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale.

Specific written permission must be obtained from the publisher for copying.

Subscription information

The subscription price for 2006 is 150 US\$ / PLZ 250 including carriage charges. IMAGE PROCESSING and COMMUNICATIONS may be ordered directly at the Institute of Telecommunications, 85-791 Bydgoszcz, ul.S. Kaliskiego 7, POLAND.

IMAGE PROCESSING & COMMUNICATIONS

An International Journal

Instructions for Authors

Contributions to IMAGE PROCESSING & COMMUNICATIONS will be welcomed from throughout the world. Manuscript should be submitted to the Editor - in - Chief. **Manuscripts are reviewed and refereed.**

Manuscripts.

Send one original and two photocopies of the manuscript and one original and two photocopies of each illustration. Upon acceptance by the Editor, we will request that you send, directly to the Editor, a soft copy of your paper in either MS Word or LaTeX format. All soft copies of accepted papers may be sent as e-mail attachments directly to Editor at: choras@utp.edu.pl

The manuscript must contain the following:

Title page listing the paper title, the name(s) of the author(s), and the affiliation and complete mailing address of each author.

Abstract, adequate as a summary (rather than an introduction), 200 words maximum. It should be possible from the abstract for readers to determine whether or not they have an interest in the paper.

Subject terms or keywords are needed, maximum of eight.

Text must be typed double-spaced. The paper must be A4-Sized (21 x 29,7cm, white) with double columns. The text must be written with 1" margins, 1" top and bottom margins and 1/5" space between columns. The texts do not contain footer and header. The tables, pictures, etc. included in the paper should fit this page size, the preferable format for graphics is EPS, BMP, etc..

Equations must be typewritten, not handwritten. Number displayed equations sequentially without letters. Define characters that might be confused (such as ϵ /one, or ω /w) at first usage.

References to published literature must be numbered consecutively in the order alphabetical under the first author's last name. Use the following formats for books or journal articles:

Books: names and initials of all authors, full title, edition, volume number, name of publisher, places of publication, year of publication.

Journals: names and initials of all authors, title of article, journal name spelled out in full, volume number, issue number, first and last page numbers, year of publication.

Author's biographies are printed . Authors should supply a brief biographical summary not to exceed 150 words.

PREFACE TO THE SPECIAL ISSUE

The 6th International Conference on Intelligent Systems Design and Applications - ISDA'06 was organized during October 16-18, 2006, in Jinan (Shandong), in China. There were about 1,700 papers submitted to the conference and the Program Committee accepted about 500 high quality papers for presentation at the conference. The Conference Proceedings were printed by IEEE Press and published by IEEE Computer Society. We were asked by Professor Ryszard Choraś, the Editor-in-Chief of this Journal, to edit a special issue comprising a number of papers from the ISDA Conference in their extended versions. Therefore, we decided to select some of the papers from the special session on Image Analysis and Biometrics - IA&B and the chapter on Image Processing. It was a very difficult task as all the papers were interesting and worthy publishing in this international journal.

We therefore made the decision on the basis of the paper subject matching with the topics of the journal. Hence, we have selected the papers you find in this special issue of the IP&C Journal. The papers introduced in this issue cover interesting subjects like *shadow removal, real-time face detection, facial expression recognition, image compression, public watermarking, data dimension mapping and data reduction for image retrieval*.

Now, and as guest editors, we are really indebted to the referees who helped review the ISDA 2006 conference papers. Most of them were loaded heavily indeed as the number of papers per referee was very high. We hope the reader will find that the postconference extended versions of the papers introduced in this issue have brought additional benefits.

- Marwan Al-Akaidi, (De Montfort University, UK)
- Anna Bartkowiak, (Wrocław University, Poland)
- Adam Dąbrowski, (Technical University of Poznań, Poland)
- Akira Imada, (Brest State Technical University, Belarus)
- Leonid Kompanets, (Częstochowa Technical University, Poland)
- Kurosh Madani, (Paris XII University, France)
- Waldemar Rakowski, (Białystok Technical University, Poland)
- Sugata Sanyal, (ST&CS, Mumbai, India)
- Władysław Skarbek, (Warsaw University of Technology, Poland)
- Jarosław Stepaniuk, (Białystok Technical University, Poland)
- Ryszard Tadeusiewicz, (University of Science and Technology, Poland)
- Sławomir Wierzchoń, (Polish Academy of Sciences, Poland)
- Toru Yamaguchi, (Tokyo Metropolitan University, Japan)

Our thanks are due to Professor Ryszard Choraś, the Editor-in-Chief of the International Journal on Image Processing and Communications, for inviting me to edit this issue and for giving the authors and young researchers the opportunity for further publication.

Ajith Abraham and Khalid Saeed (Guest Editors)
